Playlister App

1. What goal will this website achieve?
   This Website will allow users to create and share custom playlists for different occasions.

2. What will be the main demographic for this website?
   This site will mostly appeal to music lovers, but also DJs so that their clients can easily create playlists that the DJ can use.

3. In brief, outline your approach to creating your project:
   A. The database will store users and playlists.

   B. I will be integrating a music API (perhaps iTunes) not sure yet. But this will be used for dynamic searching of desired music to be added to a playlist.
   C. I will be using bcrypt to add security to the user login system
   D. The app will allow users log in, creat,e and share playlists, and copy from pre-made playlists
